Research Details :

Research Title : *A novel podophyllotoxin lignan from Justicia heterocarpa*
A novel podophyllotoxin lignan from Justicia heterocarpa

Descriptipn : Chromatographic separation of the extract of Justicia heterocarpa T. ANDERS. afforded, in addition to known fatty acids, terpenoids and steroids, a new podophyllotoxin lignan. Structures were elucidated by spectroscopic methods, and the structure of the new lignan was confirmed by single crystal X-ray diffraction studies, which have shown that there is a H-bonding stabilized dimer.

Research Type : Article

Research Year : 2004

Publisher : CHEMICAL & PHARMACEUTICAL BULLETIN Volume: 52 Issue: 5
Pages: 507-509

Added Date : Saturday, June 14, 2008
